

# Starter Shingles

Starter shingles save application time. They're designed to work specifically with different styles of CertainTeed shingles for consistent appearance and performance.

## Swiftstart

*Metric starter shingle is designed specifically for use with Landmark Series shingles. Rather than cutting expensive field shingles to use as starters, you can save time and money by starting with Swiftstart.*

- Code-compliant, meets minimum 2" headlap requirement for metric shingles; many competing products do not
- Each 18-piece bundle covers 116 linear feet
- Required to obtain enhanced warranty

## High-Performance Starter

*For use with Grand Manor, Highland Slate and Hatteras shingles.*

- "Hatteras" dual-sealant strips at bottom edge for 110 mph wind resistance
- Installation is a snap — no need to cut tabs off expensive shingles
- Provides a straight factory-cut eave edge for a clean look
- Excellent as a rake edge for increased wind resistance
- Saves time and money
- Required for Hatteras wind warranty coverage

### Specifications

- 10" x 36" starter strip
- Dual-sealant strips — CertaSeal™ Plus Modified Sealant
- Packed 34 pieces (102 linear feet) per bundle

## Presidential Starter

*Required for Presidential Shake TL and Presidential Shake shingles.*

- Assures Class A fire rating
- Two layers of a straight factory-cut eave edge; staggered offset for maximum water tightness
- Easy to handle and apply
- Available in the entire Presidential TL and Presidential color line
- Saves time and money — no need to remove tabs from expensive shingles

### Specifications

- 13-1/4" x 40" starter when applied
- Packed 22 pieces (36 linear feet of double-layer coverage) per bundle

# The Integrity Roof System™

## WinterGuard™

Waterproofing shingle underlayment prevents leaks from wind-driven rain and ice dams in vulnerable areas.

## Roofers' Select™ or DiamondDeck™

High-performance underlayment provides a protective water-resistant layer over the roof deck and secondary barrier against leaks.

## Starter Shingles

Starter shingles are designed to work specifically with each different type of CertainTeed shingle for maximum performance.

## CertainTeed Shingles

High-quality shingles available in a wide variety of styles and colors, covered by the strongest warranty in the business. Flintlastic® roll roofing products are also available for flat roof areas.

## Hip and Ridge Accessories

Accessory shingles are used to finish the hips and ridges of the roof and are designed to complement the appearance of CertainTeed shingles.

## CertainTeed Ridge Vents

CertainTeed Ridge Vents combined with sufficient intake vents, such as CertainTeed Intake Vents, are the most effective ventilation system.

# Hip and Ridge Accessories

Accessory shingles are used to finish the hips and ridges of your roof and carry the same warranty as the shingles they are applied over. There are a number of options designed to complement the appearance of CertainTeed shingles while providing the same level of protection and durability.

## Mountain Ridge™

For use with Presidential Shake™ TL, Presidential Shake™, Presidential Solaris™, Landmark™ TL, Landmark™ Series and Landmark Solaris™.

- Blended color and high-profile design
  - 5-layer design
  - Not available in all areas
- Specifications**
  - 8" Covers 24 linear feet
  - 10" Covers 20 linear feet
  - 8" exposure

## Cedar Crest™

For use with Landmark Series, Presidential™ Series, Highland Slate™ and Hatteras®. Also available in an impact resistant version to match Presidential Shake™ Impact Resistant and Highland Slate™ Impact Resistant shingles.

- This stylish, cost-effective, medium-profile ridge accessory will upgrade the appearance of any roof line with depth and dimension.
- A perfect frame for your artistry
- Algae-resistant

## Shadow Ridge™ Accessory

For use with Landmark TL, Landmark Series and Independence™.

- Easy to separate into three individual pieces by folding along pre-cut lines (metric product separates into four individual pieces)
  - Can be double-coursed to accent rooflines and enhance overall appearance
  - Size and color vary by region
- Specifications**
  - English — 12" x 36", with 5" exposure; covers 30 linear feet per bundle
  - Metric — 13-1/4" x 39-3/8", with 5-5/8" exposure; covers 45 linear feet per bundle
  - Algae-resistant

## Solaris Hip and Ridge

- Matches Landmark Solaris shingle colors
  - Also available in an impact resistant version
- Specifications**
  - Covers 33.75 lineal feet or 45 lineal feet depending on manufacturing facility

## Shangle Ridge® Accessory

For use with Grand Manor™, Carriage House™ and Highland Slate.

- Two full layers for full protection and dimensional appearance
- Specifications**
  - Covers 10 linear feet per box
  - 12" width for application over standard ridge vents
  - 8" exposure
  - Algae-resistant

# Ventilation

Attic ventilation is an important element of a home's design and construction. Effective attic ventilation helps prevent attic heat buildup, humidity and ice-dams by continuously moving air along the underside of the roof.

CertainTeed® Ridge Vents combined with sufficient intake vents, such as CertainTeed Intake Vent, are the most efficient and effective systems you can install.

## Ridge Vents

CertainTeed Ridge Vents install on the peak of the roof, allowing exhaust ventilation all along the roofline. Less than an inch in height, these molded, high-impact copolymer shingle-over any of CertainTeed's ridge vents permit capping of the ridge with shingles like the rest of the roof or with enhanced ridge and cap shingles.

- 7" filtered Class A fire rated
- 9" filtered
- 9" filtered Class A fire rated
- 12" filtered or unfiltered

### Features

- Designed with an external baffle to deflect wind and weather over the vent to help protect the attic from rain and snow infiltration. The external baffle creates low pressure over the vent openings to "pull" air from the attic

### Benefits

- Works year-round to ventilate the attic

- Easy installation – has pre-printed slot guides for truss or ridge pole construction. Pre-drilled nail holes are designed to assure proper nailing

- CertainTeed Ridge Vent is pre-formed to a 4/12 pitch, and fits pitches from 3/12 to 16/12

- Limited Lifetime Warranty and 5-Year SureStart™ Protection

- Provides evenly distributed ventilation along the entire underside of the roof

- Slim design for visual appeal

- Provides a higher volume of airflow per square foot of attic area than any other fixed-vent system

- Design maximizes airflow across the entire underside of roof sheathing

- Changes in wind direction have no significant effect on vent performance

## Rolled Ridge Vent

Independent research and testing have demonstrated that the best performing ridge vent, in terms of airflow and weather protection, is an externally baffled ridge vent. We've taken that technology and incorporated it into our ridge vents in 28-foot rolls.

- Filtered
- Unfiltered

### Features

- Designed with an external baffle to deflect wind and weather over the vent to help protect the attic from rain and snow infiltration. The external baffle creates low pressure over the vent openings to "pull" air from the attic

- Built-in ventilating weather tight end plugs flexes for different roof pitches and protects roof decking

- CertainTeed Ridge Vent fits pitches from 3/12 to 12/12

- Limited Lifetime Warranty and 5-Year SureStart™ Protection

### Benefits

- Fast and easy installation – internal ribbing adds rigidity to make the vent nail gun friendly. Roll it out and nail it down

- Prevents the premature deterioration of shingles and other roofing materials caused by inadequate ventilation

- Meets typical roof shingle warranty ventilation requirements

## Intake Vent

CertainTeed Intake Vent provides proper intake ventilation for homes with little or no overhang. It's a roof-top installed, shingle-over intake vent that can be used to supplement existing soffit or under eave vents as well.

### Features

- Designed with internal baffles and drainage system along with an internal weather filter which provides three levels of weather protection

- CertainTeed Intake Vent has a minimum 3/12 roof pitch with no maximum

- Limited Lifetime Warranty and 5-Year SureStart™ Protection

- 3/4" low profile helps it blend in with the roof

### Benefits

- Easily installs on the roof's edge

- Roof-top installation eliminates overhead with soffits and under-eaves

- Located tabs on the underside of the CertainTeed Intake Vent assist with positioning the vent over the slot

- Co-polymer construction
